

# CREATE A CLOUD OBJECT STORAGE SERVICE

DATE	15-NOV-2022
TEAM ID	PNT2022TMID07804
PROJECT NAME	IOT Based Smart Crop Protection System for Agriculture

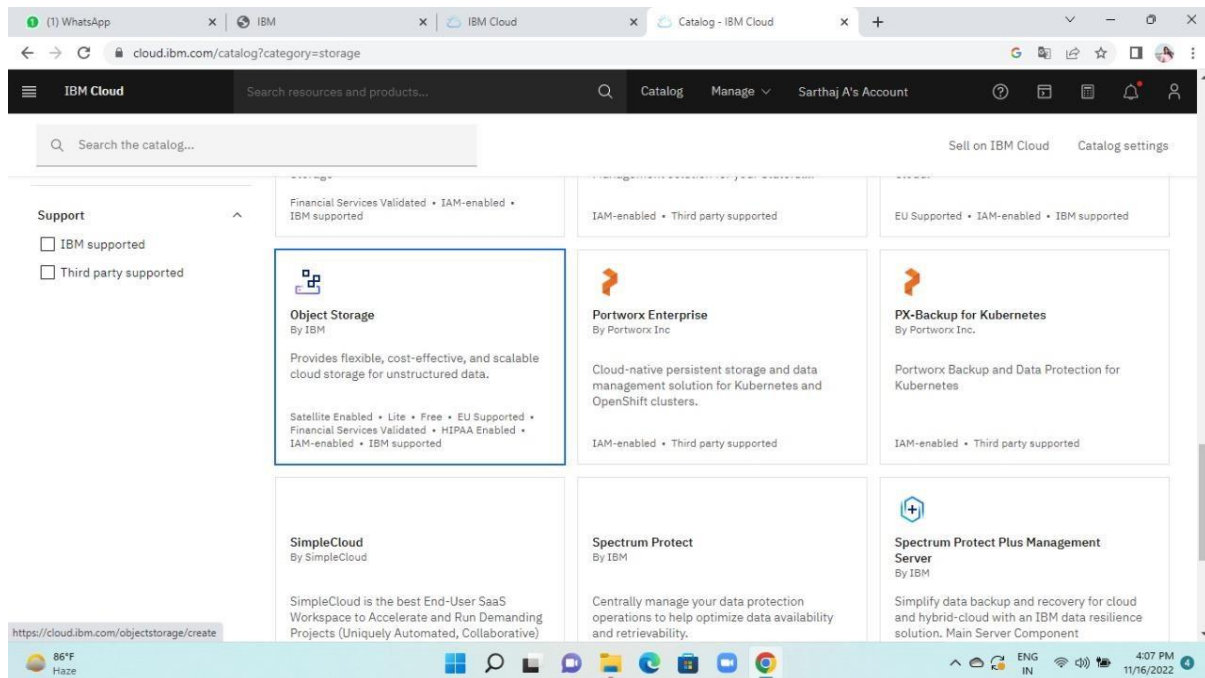

**Step 1:** Enter your IBM cloud account credentials.

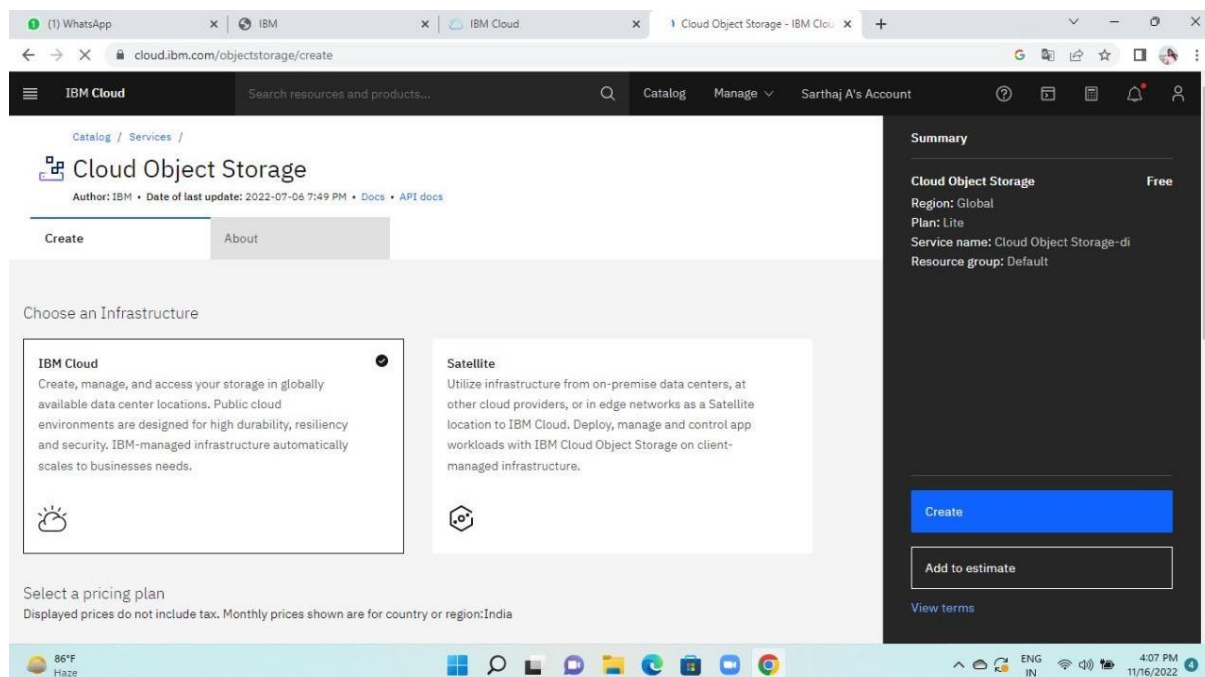

**Step 2:** open the catalog. then click on the storage.

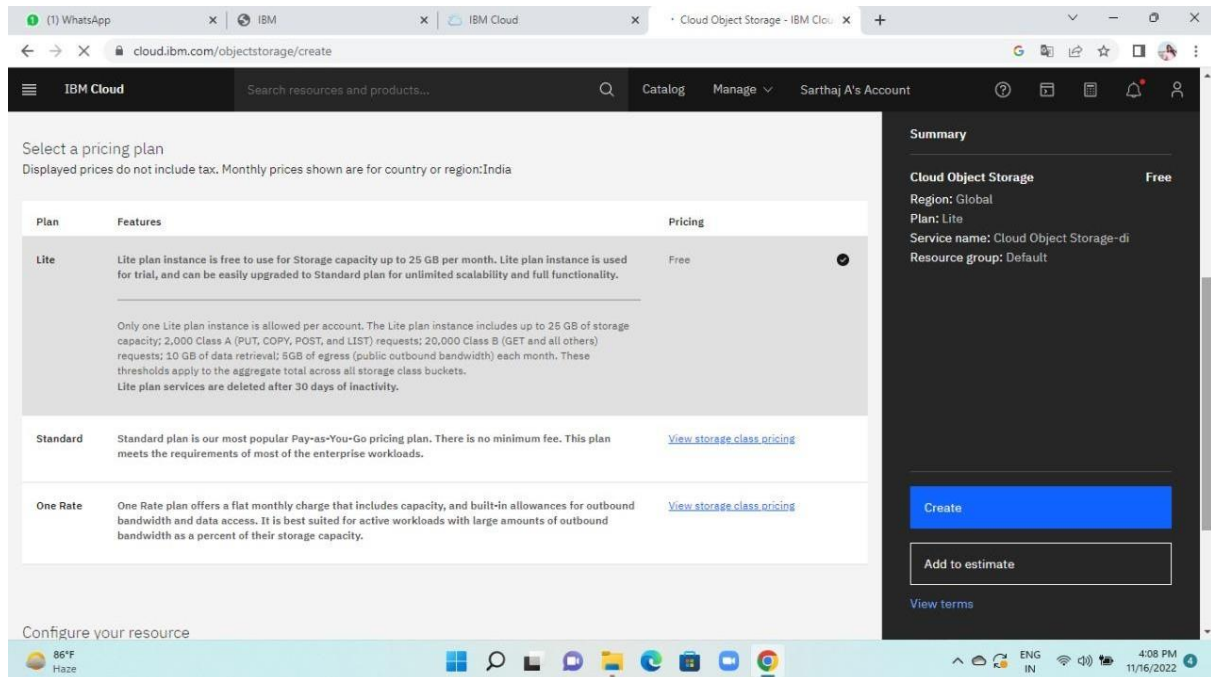

**Step 3 :** Then if you scroll down you observe object storage and click on it.

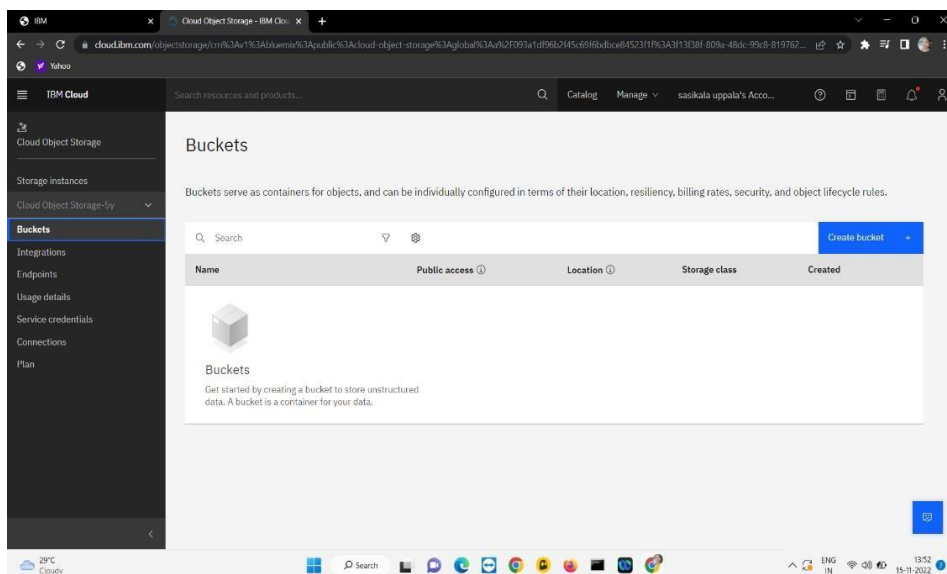

**Step 4 :** Then it will open like in the below and click on create to create the cloud object storage.

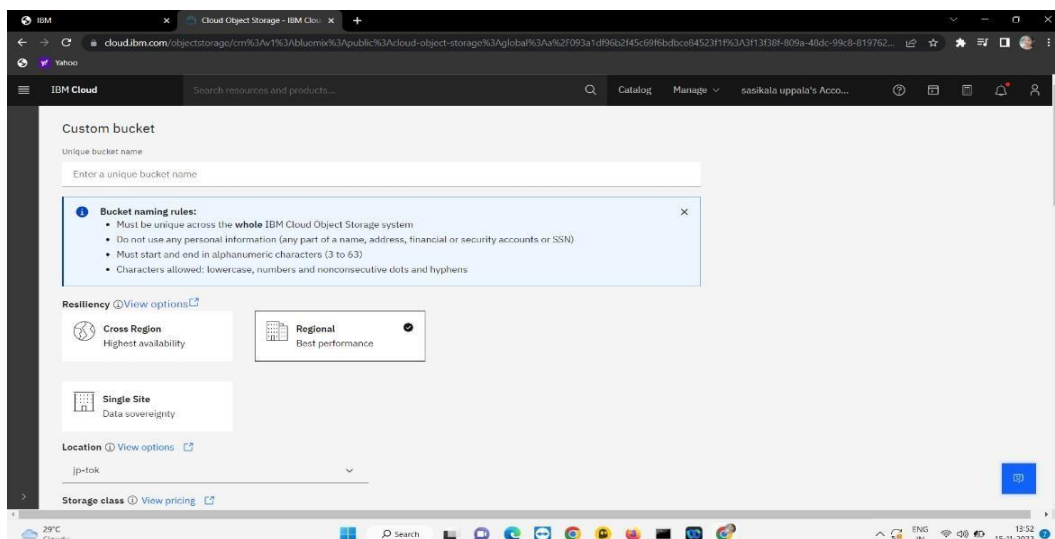

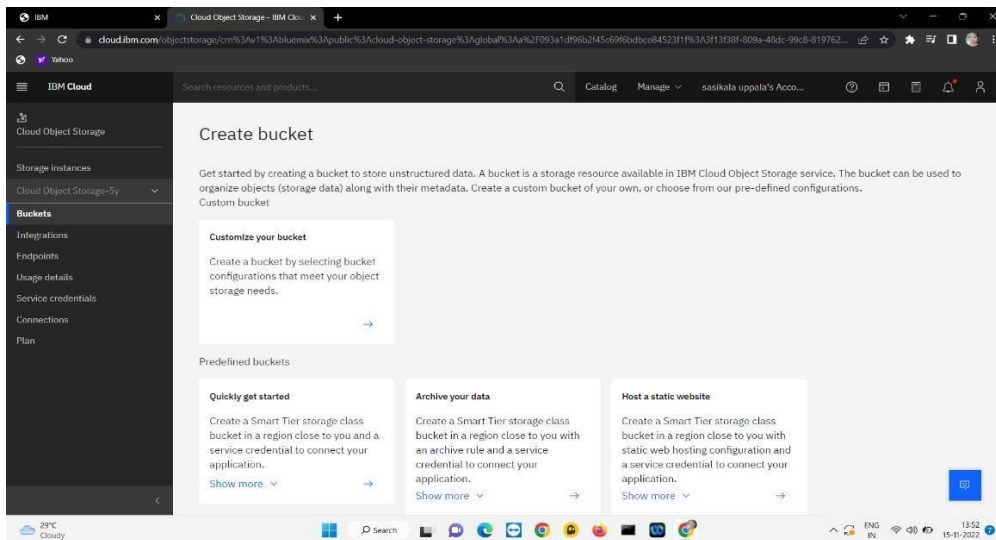

**Step 5 :** Therefore creation of cloud objectstorage is created.

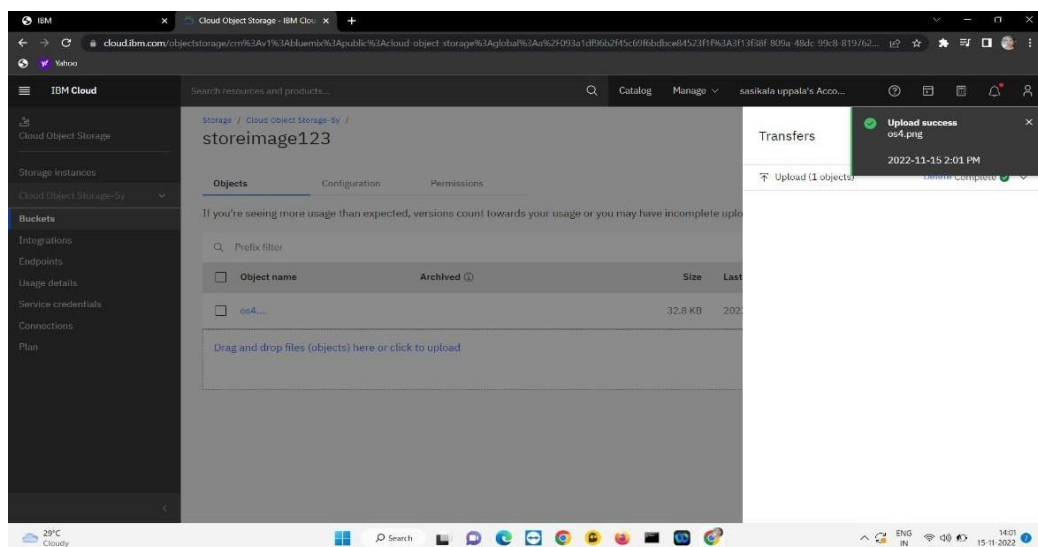

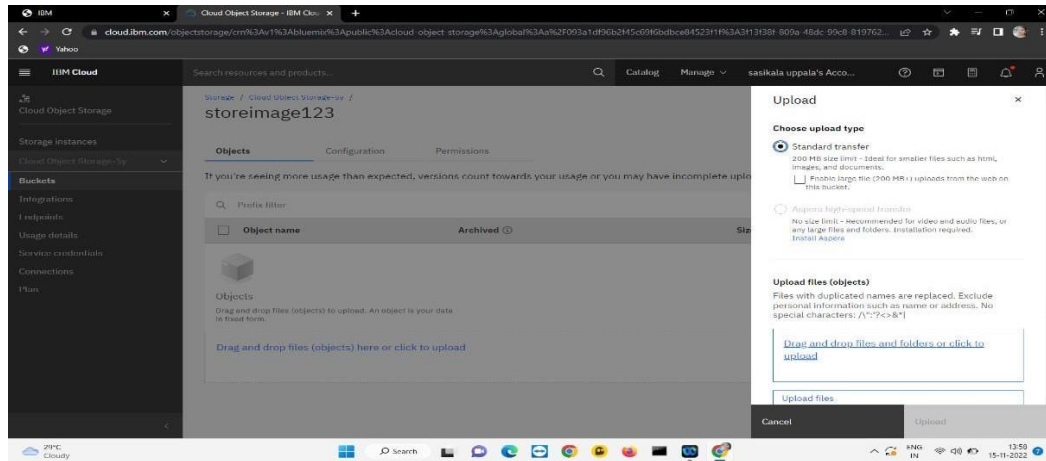

**Step 6 :** We need to establish a bucket to store the image. Clicking on it will display a few options for creating buckets. Selecting a custom bucket will open as seen below. Enter the information requested, then click the Create Bucket button.

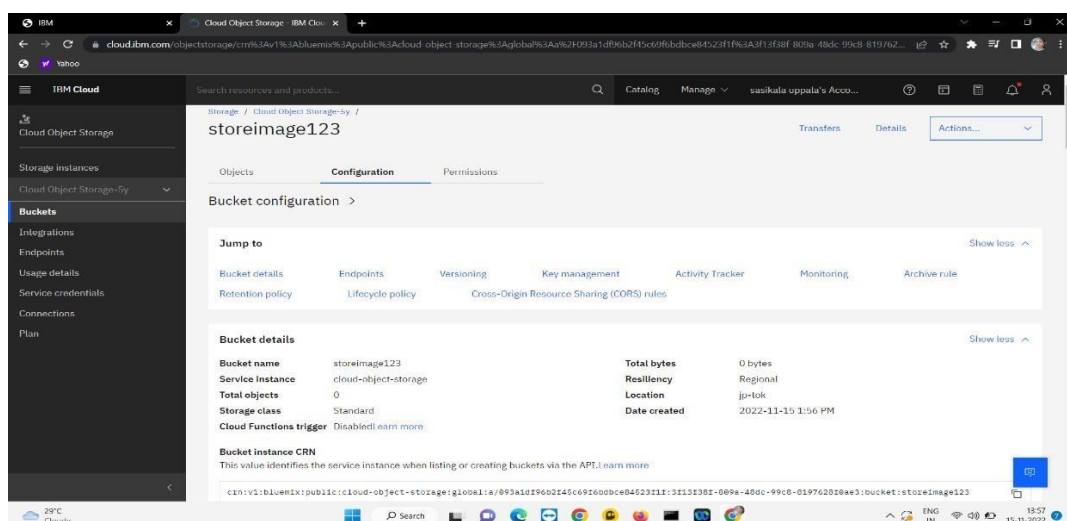

**Step 7 :** Then you get observe bucket is created successfully. And to store the images drag anddrop files shown in below picture.

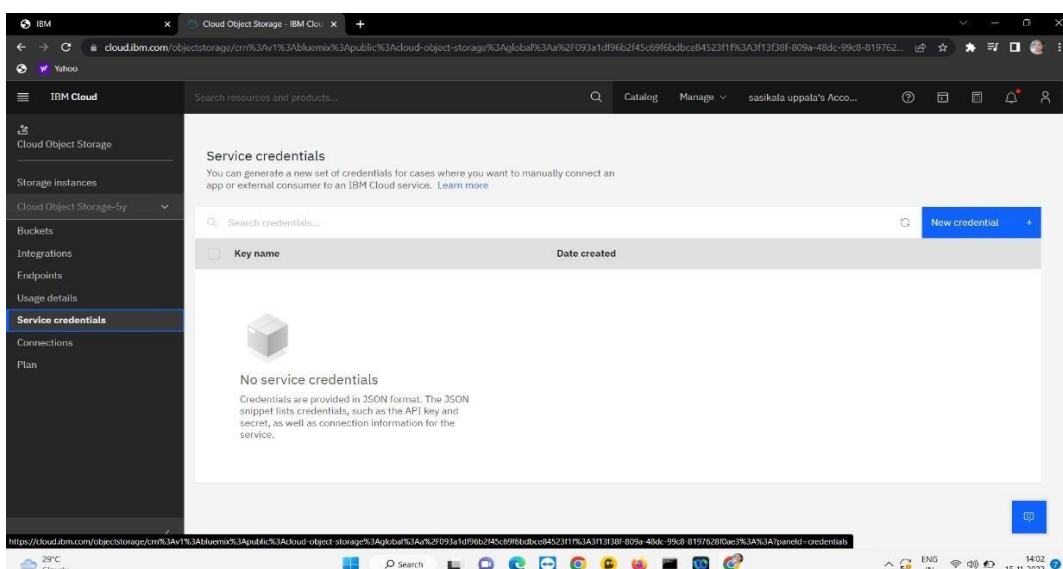

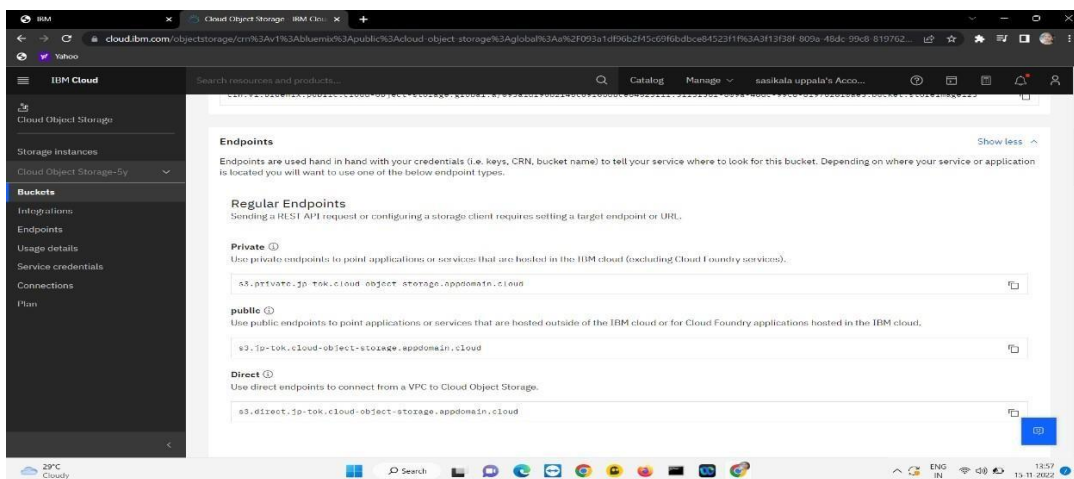

**Step 8:** Now you can see observe configuration settings as shown.

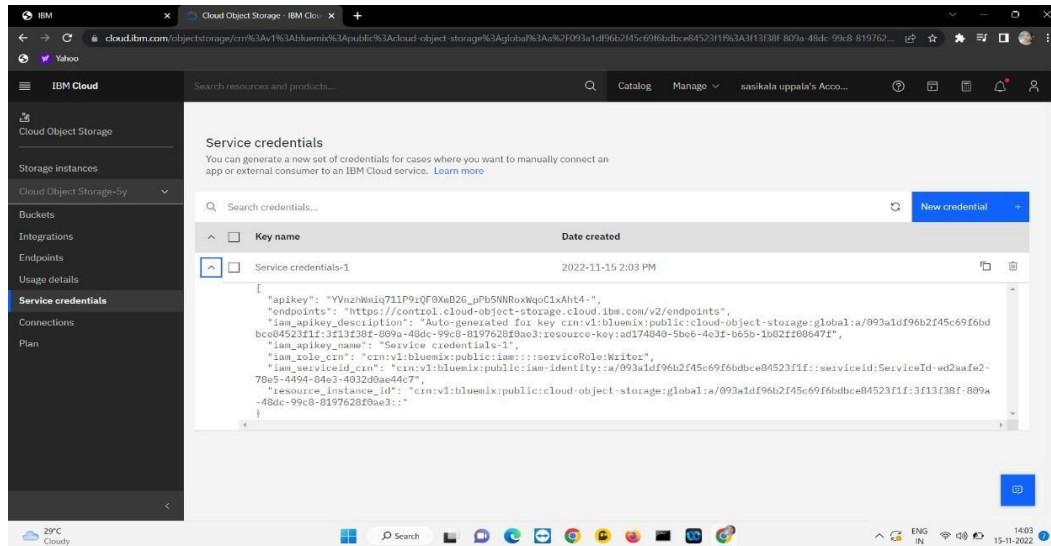

**Step 9:** Here you can see the endpoints which is used for programming.

**Step 10:** The important part is service credentials for programming integrity.

Now click on create credential then you get this the figure below and remember those for programming.

**Step 11:** Hence like this you can create a cloud object storage service, create a bucket to store the images, and configure the bucket settings.
